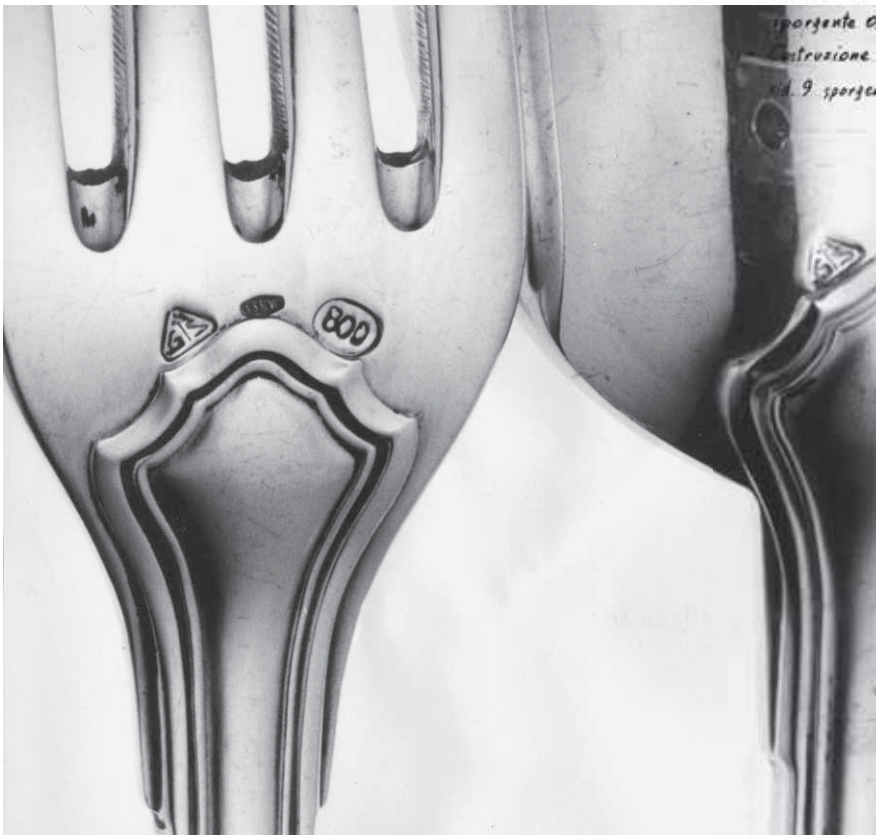
HISTORY



In 1856, Giuseppe Sambonet, a Fine Arts graduate and the son of a nobleman from Vercelli, obtained his warrant as Master Goldsmith and established the company, Giuseppe Sambonet, depositing his seal bearing the initials “GS” at the Turin mint. At the beginning of the twentieth century his company was the Official Purveyor to many noble families, including the Duchess of Genoa and the Count of Turin.
In 1932, Sambonet was the first company in Italy to build an industrial production plant capable of manufacturing both sterling silver and galvanic silverware. In 1938, it developed an innovative process for the production of stainless steel flatware and developed a silver-plated steel manufacturing technique. In 1947, it started producing stainless steel knives and blades using its own technology. In 1956, Sambonet conquered the international market by being chosen, from 53 competitors, to supply the Cairo Hilton Hotel with a hollowware line that is still in its collection today. This marked the beginning of the company’s great tradition of supplying world-class hotels and restaurants. Starting from the Sixties, great designers created collections that consolidated and popularised the company’s focus on design. Roberto Sambonet, in particular, created collections of primary importance, such as the “Pesciera”, “Center line” and “Linea 50” trays that can be admired at the MoMA in New York. Anna Castelli Ferrieri also designed a line of flatware for Sambonet. Her Hannah collection won the Compasso d’Oro award in 1994. Special mention, lastly, must be made of the Gio Ponti flatware line which has been produced since 1932. In 1997, Sambonet entered the Paderno group, an international leader in the production of professional cookware and kitchen utensils.

STORIA

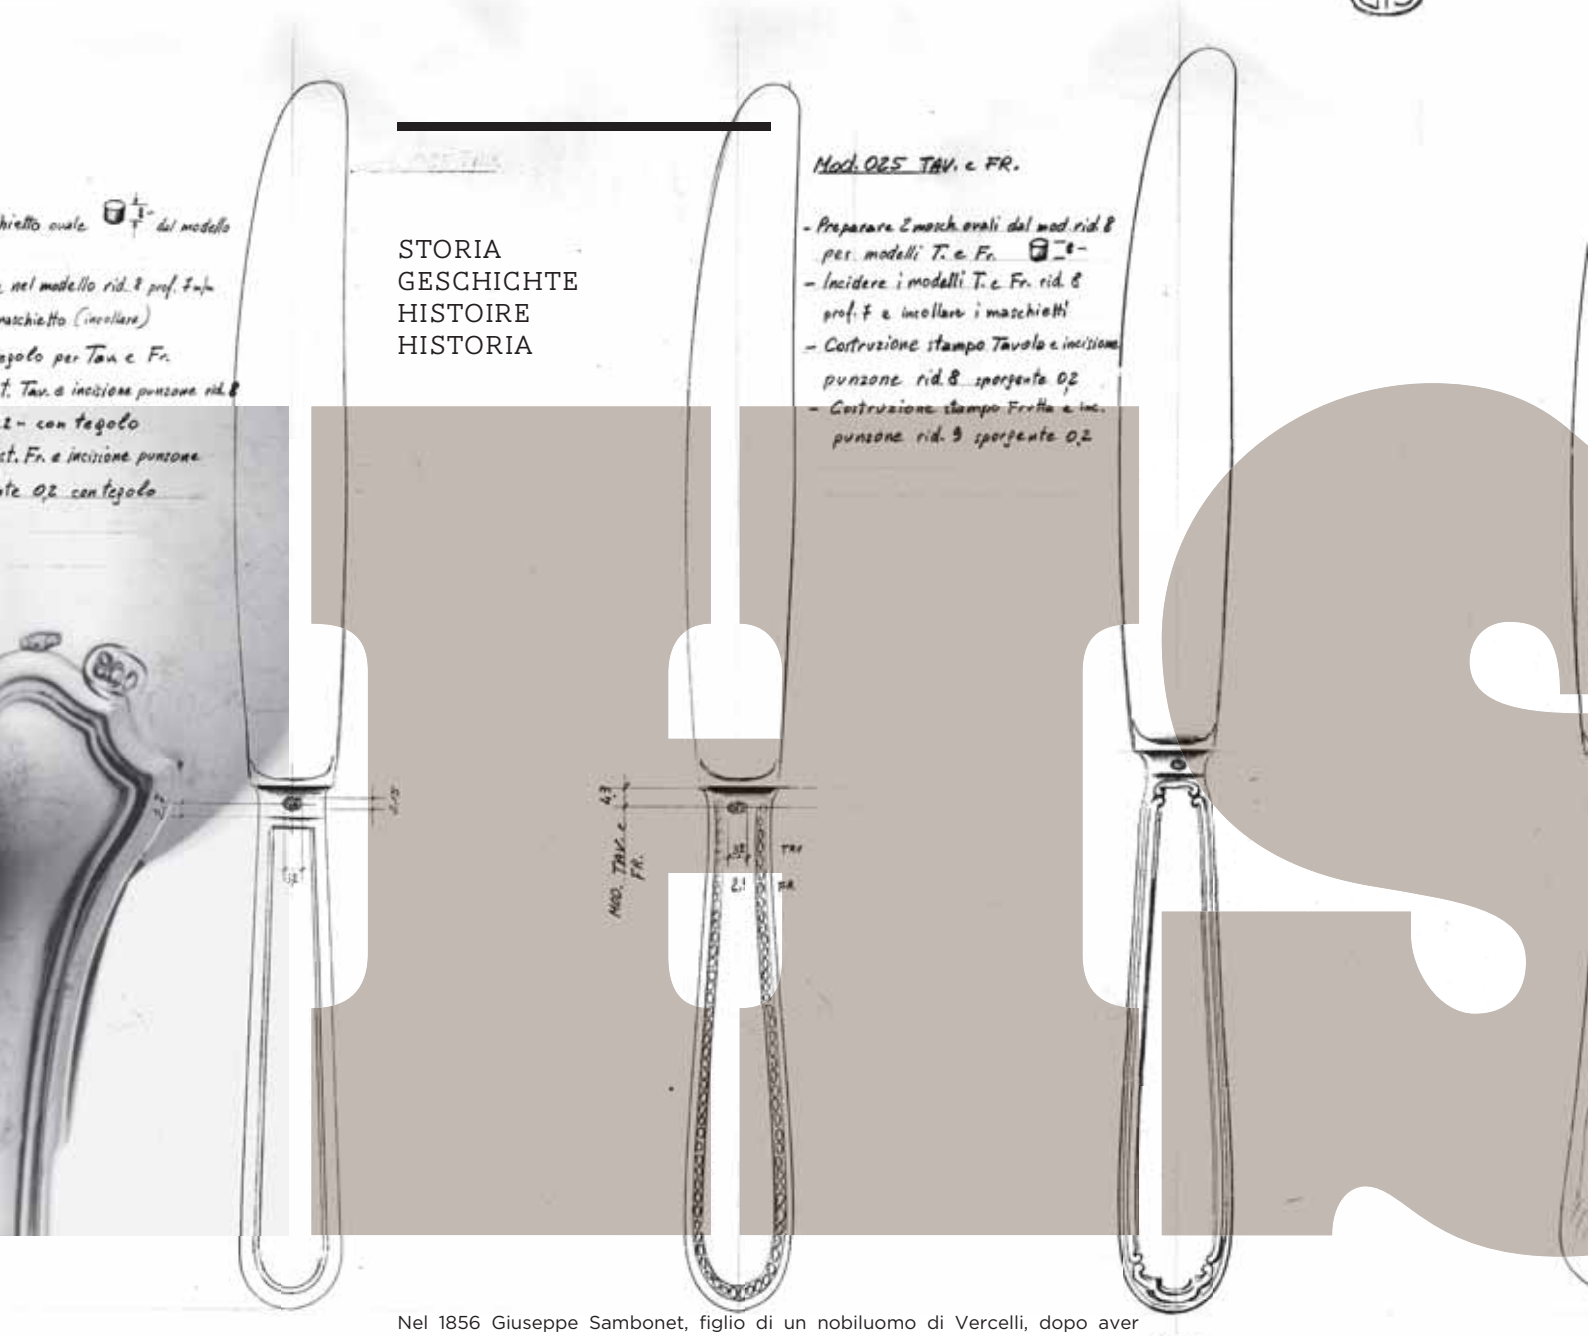
HISTOIRE
HISTORIA



Nel 1856 Giuseppe Sambonet, figlio di un nobiluomo di Vercelli, dopo aver ottenuto il diploma alle Belle Arti, ottiene il brevetto di Maestro Orefice e costituisce la ditta Giuseppe Sambonet, depositando presso la zecca di Torino il punzone con le iniziali "GS". Agli inizi del Novecento la società da lui fondata è Fornitrice Ufficiale di molte famiglie nobili tra le quali la Duchessa di Genova ed il Conte di Torino.

Nel 1932 Sambonet, prima in Italia, realizza un impianto produttivo su scala industriale capace di affiancare ad una produzione di argenteria massiccia quella in argenteria galvanica. Nel 1938 sviluppa un processo innovativo per la produzione di posateria in acciaio inossidabile e mette a punto la tecnica per l'argentatura dell'acciaio. Nel 1947 inizia con tecnologia propria la produzione di coltelli e lame in acciaio inox. Nel 1956 Sambonet conquista il mercato internazionale: prima su 53 concorrenti, si aggiudica la commessa per l'Hotel Hilton al Cairo con una linea di vasellame ancora oggi in collezione. Inizia così la grande tradizione di forniture per alberghi e ristoranti di grande classe in tutto il mondo. A partire dagli anni '60 grandi designer realizzano collezioni che affermano e diffondono l'orientamento dell'azienda al design. Roberto Sambonet, in particolare, crea collezioni di primaria importanza, come la "Pesciera", "Center line" e i vassoi "Linea 50", oggi esposti al MoMA di New York. Anche Anna Castelli Ferrieri progetta per Sambonet una linea di posateria, la collezione Hannah, vincitrice del Compasso d'Oro nel 1994. Una menzione particolare merita infine la posata Gio Ponti, in produzione dal 1932. Nel 1997 Sambonet entra a far parte del gruppo Paderno, leader mondiale nella produzione di pentolame professionale ed utensili da cucina.

Le misure espresse sono indicative e soggette a variazioni senza preavviso. In considerazione del fatto che la produzione é artigianale, potrebbero rilevarsi lievi differenze tra partite diverse dello stesso prodotto.
Le sagome delle posate illustrate sono puramente indicative e non si riferiscono alle sagome reali.

We reserve the right to alter at any time the specifications stated without notice. Considering that different operations are processed manually, some slight differences between same products of different lots may be noticed. The shapes of flatware illustrated are representatives and are not to be considered as real shape.

Wir behalten uns das Recht vor, die angegebenen Spezifikationen aus technischen Gründen jederzeit zu ändern. Da verschiedene Bearbeitungsschritte handwerksmäßig ausgeführt werden, könnten leichte Abweichungen bei unterschiedlichen Warenpartien des selben Produktes auftreten.
Das Profil der Besteck ist nur als Informationsskizze zu verstehen. Es stellt nicht die wirklichen Profile dar.

Nous nous réservons le droit de modifier à tout moment les spécifications techniques. Car différents cycles de production sont effectués artisanalement, on pourrait remarquer de légères différences entre différents lots du même produit.
Les silhouettes des couverts sont uniquement indicatives et elles ne se réfèrent pas à la silhouette réelle des couverts.

Nos reservamos el derecho de modificar las medidas indicadas sin aviso previo. Puesto que las diferentes fases del mecanizado se efectúan con un cuidado artesanal, podrian manifestarse pequeñas diferencias entre distintos lotes del mismo articulo.

PHYSICAL VAPOUR DEPOSITION

PVD IS AN ECOLOGICAL COATING TECHNIQUE WHICH INVOLVES EVAPORATING A METAL SOURCE IN A VACUUM CHAMBER. THIS SPECIAL TREATMENT HARDENS THE STEEL AND OPTIMISES ITS RESISTANCE TO RUBBING AND CORROSION. SAMBONET GUARANTEES THE QUALITY AND SAFETY OF ITS PRODUCTS BY PERFORMING LEACHING TESTS WHICH ENSURE THE MATERIALS ARE FOODSAFE.

IL PVD È UNA TECNICA DI RIVESTIMENTO ECOLOGICA CHE CONSISTE NELL'EVAPORAZIONE DI UNA SORGENTE METALLICA IN UNA CAMERA SOTTOVUOTO. GRAZIE A QUESTO PARTICOLARE TRATTAMENTO L'ACCIAIO ASSUME MAGGIORE DUREZZA E SOPPORTA MEGLIO L' USURA PER SFREGAMENTO E CORROSIONE. SAMBONET ASSICURA LA QUALITÀ E LA SICUREZZA DEI PROPRI PRODOTTI ATTRAVERSO ANALISI DI CESSIONE CHE GARANTISCONO LA CONFORMITÀ DEI MATERIALI A CONTATTO CON SOSTANZE ALIMENTARI.

HARD SAMBONET SILVERPLATING

Characteristics: an exclusive pressing process and valuable raw materials grant Contour a harmoniuos and exclusive design.
Raw materials: Nickel-Silver: copper 66%, nickel 13% and zinc 21% (CuNi12Zn24), stainless steel AISI 304 (EN X5CrNi18-10), brass and copper. Thickness varies from 1,5 to 2 mm., up to 5 mm. at the points most exposed to shocks and strain. Trays: the edge made of pressed copper is welded with Sambonet patented special process. Welding of handles, knobs, hinges, necks and bases are handmade by silver alloy brazing. Solid handles are made in hot pressed brass. Stainless steel is inserted into the handles to assure heat resistance. One piece hinges are molded and the holes gauged to assure sharp work; 145° revolving covers. The especially shaped spout ensures excellent pouring. Exclusive Sambonet silverplating process - Hard Sambonet SilverPlating:
- purity of silver 999,5‰;
- silver layer hardness, up to 2 times more than traditional silverplating (>180 Hcv);
- sulphuration resistance up to 4 times more than traditional silverplating.
- ouside features: shiny.

Caractéristiques: formes harmonieuses et uniques obtenues grâce à l'utilisation de matériaux précieux et à un procédé de moulage exclusif Sambonet. Matières premières: maillechort: cuivre 66%, nickel 13% et zinc 21% (CuNi12Zn24), acier inoxydable AISI 304 (EN X5CrNi18-10), laiton et cuivre. Epaisseur moyenne de 1,5 à 2 mm., jusqu'à 5 mm. aux points les plus exposés aux risques de chocs et de déformations. Plateaux: bord en cuivre forgé, soudé avec un procédé breveté Sambonet. Soudures: anses, pommeaux, charnières, becs et pieds, brasés en aloi d'argent faites à la main. Anses massives réalisées en laiton estampé à chaud, isolées par de l'acier inox à l'intérieur pour limiter la transmission de chaleur. Charnières massives moulées d'une seule pièce en laiton estampé à chaud. Trous calibrés pour assurer un mouvement précis; ouverture des couvercles à 145°. Facilité à verser des liquides garantie par la forme particulière du bec. Argenture exécutée par prodédé exclusif Sambonet - H§P:
- pureté de l'argent 999,5‰;
- dureté du revêtement jusqu'à 2 fois supérieure par rapport à l'argenture traditionnelle (>180 Hcv);
- résistance à la sulfuration jusqu'à 4 fois supérieure par rapport à l'argenture traditionnelle.
- finissage extérieur poli miroir.
